

Wilson Tennis Net Posts

244W / Wilson Royale Round Post with Internal Wind (3" od.)

245W / Wilson Royale Square Post with Internal Wind (3" sq.)

The Royale post body is made of Schedule 40 steel coated both outside and inside with hot zinc to prevent rust and then powder coated.

- + Deadend post has two position cable hooks and a grooved post cap. Winder side post has a brass pulley post cap.
- + The corrosion-resistant, self-locking internal wind assembly, now constructed of hardened stainless steel with matching removable handle, has been re-engineered for a superior winding mechanism:
 - + The post handle's winder screw is now secured at its end to decrease the amount of play and make tightening the net a smoother operation.
 - + The gear wheel is now smaller, with longer cogs, and is held in place from both sides, decreasing the amount of play—and thus wear—to the gears.
 - + A wheel was added to feed the tennis net cable and seat it properly onto the winder so it won't lock up.
- + Equipped with welded lacing rods for a professional net installation.
- + Collars included. Sleeves purchased separately.
- + Available in Green or Black. 64" overall length. 244W 65 lbs; 245W 75 lbs.

Royale Post Collars (included)

246W / Wilson Round Post with External Wind

This post is made of Schedule 40 steel coated both outside and inside with hot zinc to prevent rust and then powder coated.

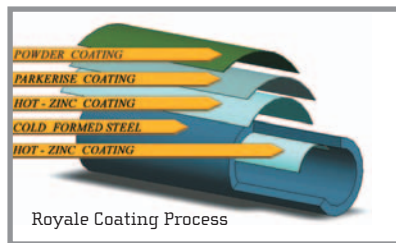

- + Deadend post has cable cleat, welded setting collar and welded lacing rods for a professional installation.
- + Aluminum reel is equipped with ratchet guard for smooth and easy adjustment and includes removable handle.
- + Both posts come with brass wheel pulley post caps.
- + Shipped with two 24" black polyethylene sleeves.
- + Green or Black. 64" overall length. 67 lbs.
