

Portable Tennis Court Standards and Net Post Pads

3440W / Wilson Hitchnet Portable Tennis Court

Now you can enjoy a game of tennis anywhere you want, whenever you want! On a basketball court or in a parking lot, wherever you go . . . you have a moveable tennis court!

- + The Wilson Hitchnet is a revolutionary net system that allows a sturdy post system to be set up between either two vehicles or one vehicle and one stationary pole.
- + Attaches to a standard two-inch square receiver on the rear of a vehicle. It takes up minimal room and easily fits in the back of a mini-van or SUV.

- + Comes with a pair of Green post "sleeves" plus a pair of Green 2-7/8" round galvanized steel posts (42"L) made specifically for the Hitchnet and equipped with our heavy-duty aluminum reel assembly that features a removable handle and ratchet guard for increased safety.
- + Patent #6,902,088 B2.
- + Fits any of our Wilson nets. 74 lbs.

Assembles in less than 10 minutes

1. Simply slide the sleeve assembly's horizontal bar into the hitch mechanism of your vehicle.
2. Then slide the specially made round net posts into the vertical sleeve and tighten all bolts. Lace up your net and you're ready to play!

243 / Portable Tennis Net Standard

Ideal for tournaments or exhibitions when temporary installations are desired. Includes 3" square steel base frame, two end and one center caster assembly. Heavy-duty nonscuff swivel casters. Easy to assemble.

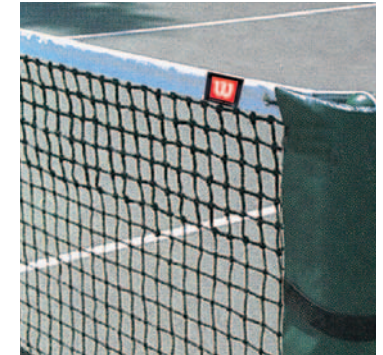

- + When ordering a net for this unit, please specify that it will be used for this portable net standard so that the net can be cut to fit. 360 lbs.

249 / Portable Net Standard

Great for indoor applications in gymnasiums and auditoriums. 2" OD heavy duty galvanized steel tubing. 42' wide for tennis.

- + When ordering a net for this unit, please specify that it will be used for this portable net standard so that the net can be cut to fit. 130 lbs.

3131W / Net Post Pad

Designed to fit both tennis net posts and provide a protective cover over most external winders.

- + They are to be used in pairs and are supplied in different sizes to accommodate the separate requirements of the winder and dead end posts.
- + The pads are constructed of two layers of high-density foam and enclosed in weather-resistant vinyl. Four wraparound poly straps with Velcro allow for easy installation.
- + Sold in eases but used in pairs.
- + Available in Black, Blue, Green, Tan or White.
- + Winder Post Pad 22" x 42". 3 lbs.
- + Dead End Post Pad 11" x 42". 3 lbs.

Net Post Pad Installation Notes

The winder handle should be removed before attaching the large pad. When the winder side pad has been installed, any new adjustments to net height will require loosening the Velcro fasteners to allow access to the winder and re-installing the pad after the change is made.

See page 26 for other types of Padding.
