Padding for Round Poles/Posts and Round Columns

When ordering padding for a circular column, you need to provide us with the circumference and diameter of the column in inches for whichever pad you want (2-1/2" or 4" thick) so that we can determine the size of the padding you will need. The finished pad size will be significantly different than the post circumference because foam changes shape as it wraps around a round object. Our sales service rep will provide you with the finished pad size and price.

*271W / 7' x 28" Wilson Column Pads

Help prevent injury to players when laced to columns as protective covers

- + 2 1/2" thick foam-filled pads with a tough, flame-retardant 13 oz. vinyl facing and heavy-duty backing.
