38 lbs. [Not shown]

## 3165 / Wilson AC Power Option

Personal Ball Machines are also available with AC Power input instead of battery.

- + Available for both 120V and 220V AC power input.

## 3170 / Optional External Battery Pack

For Wilson Personal Ball Machines 3168, 3166, 3167 and 3169. 15 lbs.

See Pages 42-45 for Ball Machine Glossary and other Ball Machines.

## 3154 / Wilson Tower Player

AC powered ball machine designed for home or tennis club use.

- + Speed ranges from 10-85 mph and spin is adjustable from heavy underspin, to flat, to heavy top spin. Ball feed rate of 1-1/2 to 8 secs., and trajectory is adjustable between ground stroke and lob.
- + Random oscillator and all-in-one control panel. 225 ball capacity. 60 lbs.

## 3172 / Wilson Tower Staff

Same as 3154, plus a two-function wireless remote.

- + Start and stop ball delivery and position ball throws on the court by starting/stopping the oscillator. 60 lbs.

## 3155 / Wilson Tower FAS

Same as 3154, plus remote control; the FAS model includes a preprogrammed two-line function.

- + At the touch of a switch, the two-line function shoots balls to two preset positions.
- + Helps an instructor work with two lines of students in a group lesson, or allows a single player to practice alternating forehand and backhand shots. 60 lbs.

## Wilson Pressureless Tennis Balls

Pressureless tennis balls are designed differently from regular tennis balls in the sense that they do not lose bounce and their covers have great longevity and wear.

- + Perfect for ball retrievers and ball machines because you don't have to replace several hundred balls every few weeks. Sold in bags.
