## Sportwall Interactive Sports Training Backboards With Non-Computerized Panels

This interactive sports training system uses cutting edge technology to provide a new dimension in training.

- + Each system includes a patented sand-filled feature that ensures a quiet backboard session.
- + Made of the best materials available, these backboards are strong, lightweight and highly durable.
- + All the backboards include an 85 degree backslope for maximum ball performance.
- + All components are made of schedule 40 galvanized steel
- + All systems include a 4' h catch net to keep high balls in play.

Trainer Series is made of a proprietary material blend of Forton MG (fiberglass reinforced gypsum), with a rigid epoxy bound core. Available either 8' or 10' H.
